Scholarships for the
University of Kentucky International Summer Experience in Renewable Energy in Pamplona Spain

The College of Engineering at the University of Kentucky is pleased to partner with the Pamplona Learning Spanish Institute to present an education abroad opportunity this summer, a renewable energies course in Pamplona, Spain. The Navarre region of Spain generates 70% of its energy from renewable resources, so this course will provide a unique perspective on the local application of green energy resources. The course is lecture-based, but includes site visits to various renewable energy installations.

Students participating in the program will receive up to six credit hours from UK in CME599 (credit as 599 from other departments may also be possible). For most UK engineering majors, this will count as an Engineering Science Elective.

Information on the course is found at:
http://pamplona.engineering.uky.edu/

The Power and Energy Institute of Kentucky (PEIK) (www.engr.uky.edu/power) is offering scholarships for $2000 towards the expense of the International Summer Experience. The scholarships are available only to current students in the College of Engineering at the University of Kentucky. Students pursuing a graduate or undergraduate certificate in power and energy with PEIK will be given first priority, as well as students with prior coursework in power and energy areas,

Target date for scholarship applications: April 1.
(Scholarship applications can be submitted up until May 1, but applications submitted by April 1 will receive priority, and notice by April 15.) Submit the applications to
Larry Holloway
Director, Power and Energy Institute of Kentucky
Chair, Department of Electrical and Computer Engineering
453 FPAT
University of Kentucky,
Lexington, KY 40506
Email: holloway@engr.uky.edu
(All email should have the word “Pamplona” in the subject line.)
Scholarship Application for the University of Kentucky International Summer Experience in Renewable Energy, Pamplona Spain

First Name: ___________________________ Last Name: _______________________________

UK Student ID: ______________________

Email address: ___________________________ Phone: _________________________________

Mailing address: _____________________________________________________________

____________________________________________________________________________

Current Major: _______________________________________________________________

Current program: (BS / MS / PhD) ________________________________

Current GPA: ________________________________

Are you pursuing the undergraduate or graduate certificate in power and energy through PEIK?

____________________________________________________________________________

Past courses related to power or energy related areas?

____________________________________________________________________________

____________________________________________________________________________

Are you registered for any courses in power or energy related areas for the coming Fall semester? If so, which?

____________________________________________________________________________

____________________________________________________________________________

Is there anything else you feel should be considered related to your participation in this program and your receipt of the scholarship? (attach additional sheet if needed)
